PROFESSIONAL SUMMARY

Information Systems & Cybersecurity student with hands-on experience building and deploying web applications, AI-assisted workflow systems, cybersecurity training tools, and infrastructure labs. Brings more than two decades of operational leadership, troubleshooting, process improvement, and team support experience to technical roles across IT support, systems, networking, cybersecurity, and operations.

TECHNICAL SKILLS

Systems & Support: Windows 10/11, Windows Server, Active Directory, hardware/software troubleshooting, technical documentation

Networking & Security: TCP/IP, DNS, DHCP, Wireshark, Nmap, Kali Linux, Security Onion, network troubleshooting

Development & Automation: Python, Flask, HTML/CSS, JavaScript, SQL, Git/GitHub, REST APIs, PowerShell fundamentals

Infrastructure & AI: Hyper-V, VirtualBox, PostgreSQL, Railway, OpenAI API, structured AI workflows

SELECTED TECHNICAL PROJECTS

Gnojo | AI-Assisted Knowledge Integrity Platform | [Portfolio](#) | [GitHub](#)

- Built a Flask platform that detects knowledge-integrity problems and guides human-reviewed repairs while preserving provenance, validation, and review state.
- Designed AI-assisted workflows for inspection, explanation, repair proposals, and previews while keeping consequential actions under explicit human control.

CyberSlooth | Bounded Autonomous AI Research System | [Portfolio](#) | [Live](#) | [GitHub](#)

- Built and deployed a research system that safely retrieves public web evidence, performs structured AI analysis, preserves provenance, and publishes a Daily Discovery.
- Implemented SSRF-safe retrieval, bounded one-hop exploration, PostgreSQL archival, cross-run scoring, idempotent publication, and Railway-scheduled autonomous runs.

SmartFix | Service Workflow Application | [Portfolio](#) | [Live](#) | [GitHub](#)

- Built a full-stack Flask workflow system for service requests, estimates, scheduling, invoicing, follow-ups, analytics, and planning.
- Deployed NW Home Fix as a working portfolio demonstration of the customer-facing experience and the workflow software supporting it.

Project IronGate | Cybersecurity Training Application | [Portfolio](#) | [Live](#) | [GitHub](#)

- Built an interactive cybersecurity training site covering phishing, social engineering, weak passwords, unknown USB devices, and ransomware.
- Implemented guided scenarios, knowledge checks, immediate feedback, browser-based progress/resume behavior, completion certificates, and responsive GitHub Pages deployment.

EDUCATION & CREDENTIALS

Tacoma Community College | Tacoma, WA

AAS, Information Systems & Cybersecurity, In Progress · Expected 2027

Dean's List | Technical Support Certificate, 2026 | Help Desk Certificate, 2026

APPLIED TECHNICAL EXPERIENCE

- Built Windows 10/11, Windows Server, Ubuntu, Kali Linux, Security Onion, and Metasploitable virtual environments using Hyper-V and VirtualBox.
- Configured IP addressing, routing, virtual networking, Windows/Linux connectivity, and Active Directory lab services; used Wireshark and Nmap for troubleshooting and analysis.
- Produced help-desk playbooks, troubleshooting workflows, incident-response material, lab reports, and technical documentation focused on clear, repeatable support procedures.

ADDITIONAL TECHNICAL WORK

AI Operations Assistant | Operational Reporting & Risk Analysis

Built and deployed a Flask application that turns structured operational data into concise reports, risk analysis, and decision-ready summaries.

Windows Server / Help Desk Labs | Systems & Support

Built and supported Active Directory, DNS/DHCP, virtualization, ticket workflows, SLAs, troubleshooting exercises, and technical documentation.

SECURITY & PROJECT DOCUMENTATION

- Developed security risk assessments, incident-response plans, remediation recommendations, and technical documentation using structured cybersecurity frameworks and course lab evidence.
- Applied project-management practices across scope, scheduling, risk, budgeting, communications, and technical project delivery.

PROFESSIONAL EXPERIENCE

Columbia Distributing | Merchandising Supervisor | Oct 2021 - Jan 2025

- Led field merchandising operations across multiple customer accounts, coordinating priorities, employee support, training, issue resolution, and customer communication.
- Served as a primary point of contact for employees and retail partners, triaging time-sensitive issues and coordinating follow-up across multiple locations.
- Recruited, trained, and coached field staff while maintaining consistent execution and compliance across customer accounts.

Whole Foods Market | Associate Store Team Leader / Grocery Leadership | Jul 2002 - Aug 2021

- Led large, technology-dependent retail operations with responsibility for teams, customer experience, training, inventory, financial performance, and company-program execution.
- Improved weekly sales by 45% and operating income by 100% through process improvement, disciplined execution, and team development.
- Piloted inventory procedures that improved accuracy and reduced shrink; the approach was adopted across the region.
